

CORDEX workshop takes off at IITM

THE CORDEX South-Asia Training Workshop was inaugurated at the Indian Institute of Tropical Meteorology on Wednesday, featuring dignitaries from Asian countries. The three-day workshop focuses on skill development in analysis and verification of results from CORDEX climate models. Director IITM Dr BN Goswami inaugurated the workshop.

The CORDEX South Asia Training Workshop focuses on skill development in analysis and verification of results from the CORDEX climate models, compilation and writing of analytical results to be eventually submitted for publication in peer reviewed journal. The theme is analysis and interpretation of down-scaled climate simulations over South Asia, understanding current uncertainties in climate projections and application of climate downscaling. ENS
